Sathguru Management Consultants P.Ltd’s mission is to engage in global development in emerging economies of the world, in particular India, South Asia and Africa in the field of agriculture, food, animal health and human health. Advise national policy planners in development initiatives and engage with industry to transform private enterprises into sustainable economic value creators.

Sathguru provides lived opportunities for students to engage in experiential learning in the developing world environment. The guidance by experienced professional mentors provide the students needed guidance all through the engagement process.

Areas of focus include content development, user interface software, GIS, machine learning, and working in the life sciences research and advisory group. Sathguru also welcomes students focusing on agricultural development.

The Human Resources department will assist in securing accommodation options in Hyderabad.
