What is an ORCID iD?

- ORCID (Open Researcher and Contributor ID) is a nonproprietary alphanumeric code to uniquely identify scientific and other academic authors and contributors.

- The ORCID organization offers an open and independent registry intended to be the accepted standard for contributor identification in research and academic publishing.

- An individual ID addresses the problem that names alone are not unique, can be changed, have cultural differences in name order, etc.

- CALS and other colleges will be able to mine scholarly publications and be able to automatically report more accurate information that are specific to works authored by people within the University.
  - Feed information to applications containing your public-facing profile
  - Produce activity-driven reports to various levels of management in the University
Obtaining an ORCID iD

• The University would like you to link your ORCID to Cornell so that published works could be easily identified as belonging to a particular author and allows CALS and the University to have more accurate data pertaining to publications.

• If you don’t have an ORCID, go to the ORCID@Cornell (http://guides.library.cornell.edu/orcid) website to get information about ORCID and to get your ORCID ID created or go directly to https://orcid.org/register.

Connecting Your ORCID to Cornell

Hello Simeon Warner

We have stored your ORCID ID (http://orcid.org/0000-0002-7970-7855).

Your ORCID ID will be released to applications that use Cornell Shibboleth Single Sign-On (SSO) for authentication. It will also allow Cornell to keep up to date with the publications listed in your ORCID record, or associated with your ORCID ID in systems used by publishers, funders, and other organizations. For more information or help, see ORCID@Cornell.
