

So, you're thinking about changing your major...

Visit the professional career counselors in 140 Roberts Hall. They can help you discover the major that best suits your interests. Check out the [Admissions Office information](#) pages, and [department web sites](#). You might be surprised at what you learn! When you find a major that interests you, visit the contact person listed below. Talk about career possibilities and your progress toward completion of major requirements in relation to the time you have left at Cornell. If you haven't already, you might want to take some classes in the major first to decide if you like it. Once you decide to enter the major...

Talk to the contact person in the major you're interested in. They can answer your questions about the major and explain the application process. Some majors have requirements that must be met before you are accepted to the major; for instance you may have to take specific courses or meet a GPA requirement. Once you are approved to change your major, the contact person below will help you secure a new advisor if necessary. They will initiate the change by working with the college Registrar's Office who will make the official change. Please inform your old faculty advisor and/or department rep that you have changed your major.

To change your advisor only (not your major) speak with the contact person from your major listed below.
