

# Dairy Processing Specialization

*The dairy processing specialization emphasizes understanding the chemistry, microbiology, and engineering properties of dairy foods to improve the quality, safety, and manufacturing methods of milk, cheese, and other processed dairy products.*

## One-year, course-based master's degree program

Offered by Cornell University's #1 nationally ranked Food Science and Technology program, the MPS graduate degree program offers customized coursework and experiential projects to advance technical knowledge and career potential in the Dairy Processing Industry.

The 30-credit master's degree program can be completed in as little as two semesters of full-time study and prepares individuals for the contemporary workplace through knowledge development, refinement of analytical tools, and advanced training in the latest theory and methodology related to Dairy Processing. This master's degree program broadens expertise and expands professional versatility to produce the next generation of innovative leaders in the Dairy Industry or related field.

Sam Alcaine, Assistant Professor

### #1 Ranked Food Science and Technology Program

Internationally recognized faculty with global reach expertise in all facets of food science.

Excellent selection of courses in basic and applied sciences.

Modern, well-equipped research laboratories and pilot plant facilities.

Established relationships with major national food companies.

### Flexible, Interdisciplinary Program

Students work with world-renowned faculty and dedicated program staff to develop an individualized course of study based on their area of interest.

The majority of courses (20 credits) will be within CALS; however, students have the opportunity to take courses across a range of fields of study at Cornell.

With the guidance of a faculty advisor, students work on solving a real-world problem, gaining valuable insights and skills for career next steps.

### Dedicated Career Support

Network of supportive Cornell alumni and professionals, such as the Food Science Advisory Council.

Information sessions and networking events with food industry employers.

Assistance with interview skills, résumé writing, and identifying career opportunities through Cornell's Office of Professional Programs and Extended Learning.

## Admissions Requirements

Bachelor's degree in scientific field, such as microbiology, chemistry, biology

For non-science background, at least 15 credits of introductory college-level science courses, including general chemistry, organic chemistry, general biology, and corresponding labs. Coursework in microbiology and biochemistry is recommended.

GRE

TOEFL/IELTS for international applicants

Additional requirements and application can be found at: [gradschool.cornell.edu](http://gradschool.cornell.edu)

## Careers

100% of Food Science MPS graduates find placement within six months of completing the program. Alumni are hired by a range of employers, including:

Chobani

Cargill

Tillamook County Creamery Association

Dannon

Byrne Dairy

**FINANCIAL AID** While students are responsible for funding their education, Cornell is committed to a strong return on investment and has dedicated financial aid resources.

## Dairy Processing

This area of study focuses on the principles and practices fundamental to the processing, evaluation, storage, and use of dairy products. Students gain experience with traditional and emerging food processing technologies and have access to Cornell University's many facilities and programs committed to dairy research, including a state-of-the-art dairy processing plant, the Milk Quality Improvement Program, and the Northeast Dairy Foods Research Center.

## Sample Curriculum

| COURSE           | TITLE  |
|------------------|--|
| <b>FDSC 4180</b> | Principles and Practices of Growing Grapes and Making Wine |
| <b>FDSC 4210</b> | Growing Grapes and Making Wines Graduate Laboratory        |
| <b>FDSC 6040</b> | Wine and Grapes: Composition and Analysis                  |
| <b>FDSC 6000</b> | Sensory Evaluation of Food                                 |
| <b>FDSC 6010</b> | MPS Project  |
| <b>FDSC 5000</b> | Seminar in Food Science                                    |

| COURSE           | TITLE                                      |
|------------------|--|
| <b>ANSC 4010</b> | Dairy Industry Seminar                     |
| <b>FDSC 4010</b> | Concepts of Product Development            |
| <b>FDSC 4170</b> | Food Chemistry I                           |
| <b>FDSC 4250</b> | Dairy Processing and Emerging Technologies |
| <b>FDSC 6650</b> | Food and Bioprocessing Systems             |
| <b>FDSC 5000</b> | MPS Project                                |
| <b>FDSC 6000</b> | Seminar in Food Science                    |

# Alumni Spotlight

## Joseph B. Tarnate, MPS '18

Prior to attending Cornell, I was an undergraduate student at University of Florida pursuing a degree in Animal Science. After gaining knowledge on the production side of agriculture, I wanted to learn more about the processing side. Cornell's Food Science Department offers amazing courses taught by well-renowned professors in the industry.

I chose the Cornell Food Science MPS program because of its short duration and the flexibility it provides for students to tailor their research and experiences to their own personal desires and interests. It's a great program for students who want to work in the industry soon after completing an undergraduate degree and want to specialize in certain skills prior to working.
