

# COVID-19 Decision Tree for the Food industry

- \* Symptoms**
- Fever (100.4°F or above)
  - Chills/Repeated shaking with chills
  - Cough
  - Shortness of Breath
  - Chest Pain
  - Out of the ordinary tiredness
  - Bluish lips or face
  - Muscle pain
  - Runny nose/Nasal congestion
  - Sore throat
  - Lost sense of smell or taste
  - Gastrointestinal problems (diarrhea)

- \*\* Close Contact**
- Who is considered Close Contact:
- Household member.
  - Intimate partner.
  - Individual providing care in a household without using recommended infection control precautions.
  - Individual who was directly coughed on.
  - Individual who was within 6 feet of an infected person for at least 10 minutes starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the criteria for return to work were met. Contact is considered Close Contact irrespective of whether the person with COVID-19 or the contact were wearing a cloth face covering at the time of exposure.

- \*\*\* Vaccine**
- When is a person considered Fully Vaccinated:
- 2 weeks after their second dose in a 2-dose series (Pfizer or Moderna)
  - 2 weeks after a single-dose vaccine (Johnson & Johnson's Janssen)

- \*\*\*\* CDC Precautions (Talk to your local Department of Health)**
- Employers should measure the employee's temperature and assess symptoms before the individual enters the facility every day.
  - Employee should self-monitor under the supervision of their employer's occupational health program.
  - The employee should wear a face mask or employer approved cloth face covering at all times while in the workplace.
